GEORGES YOUKHANNA

IT Student | Aspiring Cybersecurity Analyst | Security-Focused Developer

Baabdat, Lebanon | 03 369352 | georgesyouhannna@hotmail.com | linkedin.com/in/george-youkhanna

PROFILE

Senior Information Technology student at Notre Dame University - Louaize (NDU) with hands-on experience in cybersecurity, secure web development, SOC workflows, OSINT tooling, authorized security assessment, and AI-assisted software development. Built practical security projects including ShadowWatch, Spectre, and Revenant. Seeking cybersecurity, security engineering, or software development opportunities.

EDUCATION

Notre Dame University - Louaize (NDU) - Zouk Mosbeh, Lebanon

Bachelor's Degree in Information Technology - Senior Year (In Progress)

PROFESSIONAL EXPERIENCE

Project Coordinator - Probuild LV Group | 2024 - 2025

Bartender - On The Rocks | Broumana, Lebanon | 2019 - 2023

PROJECTS

ShadowWatch - SOC Training Simulator

PHP | MySQL | HTML5/CSS3 | Vanilla JavaScript

- Built a full-stack SOC training platform for alert triage, incident tickets, log analysis, threat intelligence, and analyst progression.
- Implemented PICERL-based workflows, IOC extraction, role-based access control, CSRF protection, bcrypt hashing, and PDO prepared statements.

Spectre - OSINT Investigation Platform

OSINT | Investigation Graphing | Security-Focused Web Application

- Built an OSINT investigation platform that organizes intelligence into cases, entities, relationships, evidence, and interactive investigation graphs.
- Supports structured reconnaissance and investigation workflows with clear separation between passive collection and explicitly authorized active assessment.

Revenant - Authorized Offensive Security Assessment Platform

Penetration Testing | Security Assessment | Evidence & Reporting

- Built for authorized penetration testing of organizations and enterprises, taking assessments from engagement scope through reconnaissance, enumeration, vulnerability assessment, and controlled validation.
- Enforces defined targets and authorization boundaries while organizing assessment evidence, findings, remediation retesting, and final reporting into a structured workflow.

TECHNICAL SKILLS

Languages & Web:	PHP, C++, Python, JavaScript, HTML5, CSS3
Databases:	MySQL
Operating Systems:	Linux, Kali Linux, Windows
AI Development:	AI-assisted application development, AI agent integration, prompt engineering, AI/ML fundamentals
Cybersecurity:	SOC alert triage, incident response, log analysis, threat intelligence, OSINT, authorized penetration testing, vulnerability management
Systems & Security:	System Analysis & Design, Reverse Engineering, Memory Manipulation, secure application development
Networking:	Physical and virtual networking fundamentals

CERTIFICATIONS

- **Introduction to Cybersecurity** - Cisco Networking Academy | May 2026
- **Vulnerability Management** - Security Blue Team | Dec 2025 | Credential ID: 31390272
- **Game Hacking Development** - Red Team Leaders | Nov 2025
- **Web Attack Investigator** - LetsDefend | Oct 2024
